## Professional Summary

---

Computer Science and Engineering undergraduate with hands-on experience in Machine Learning, Artificial Intelligence, and Full-Stack Web Development. Actively working on ML-based academic and research projects involving data preprocessing, model training, and evaluation. Proficient in building responsive user interfaces, integrating APIs, and developing data-driven systems. Strong foundation in programming, algorithms, and modern software engineering practices, with a keen interest in applied AI and scalable web technologies.

## Technical Skills

---

**Programming Languages:** Python, C, C++, Java, JavaScript, PHP, HTML, CSS

**Machine Learning & AI:** Data Mining, Machine Learning, Deep Learning, Model Training, Data Preprocessing

**Web Technologies:** Front-End Development, REST APIs, Full-Stack Development

**Tools & Platforms:** Git, LaTeX, MS Office, Lucidchart, Canva

**Soft Skills:** Communication, Leadership, Team Collaboration, Problem Solving, Adaptability

**Languages:** Bangla (Native), English (Fluent)

## Education

---

**Green University of Bangladesh**

2022 – Present

B.Sc. in Computer Science & Engineering

CGPA: 3.05 / 4.00

**Hajiganj Model Govt. College**

2018 – 2020

Higher Secondary Certificate (Science)

GPA: 4.90 / 5.00

## Experience

---

**Academic & Technical Support (Informal)**

Oct 2021 – Jun 2022

- Assisted learners with ICT fundamentals, documentation tools, and introductory programming concepts.
- Supported academic tasks involving data handling, presentations, and structured problem-solving.

**Peer Technical Assistance (Informal)**

Apr 2023 – Feb 2024

- Guided peers in programming fundamentals using Python, C, and Java.
- Helped debug basic logical and runtime errors in academic-level programs.

## Projects

---

**ARFF Tree Explorer (Artificial Intelligence)**

- Developed an interactive tool for ARFF dataset exploration, preprocessing, model training, and decision tree visualization.
- Automated feature analysis and model interpretation to support machine learning education.

**Lifeline Charity Platform (Web Application)**

- Built a secure web platform connecting patients, donors, and administrators.
- Implemented role-based access control, verified case management, and transparent donation tracking.

**Ride Sharing System (Shell Scripting)**

- Implemented a command-line system to manage users, rides, bookings, and fare operations.
- Used structured menus and file-based data storage.

**Blog Website – Online Storytelling Platform**

- Developed a responsive blog platform with authentication, post management, and pagination.
- Focused on clean UI and scalable content organization.

**Weather Tic-Tac-Toe (Java Networking)**

- Created a multiplayer Tic-Tac-Toe game integrating real-time weather API data.

- Applied Java networking, GUI components, and rule-based logic.

#### **University Management System**

- Designed a system supporting user accounts, secure data storage, search, and CRUD operations.

#### **IT Club Management System**

- Developed a management system for member records, event scheduling, and resource allocation.

### **Research (Ongoing)**

---

#### **Predicting the Effect of Drugs on Neonates using Machine Learning and Explainable AI**

- Applying machine learning models to neonatal clinical data to predict drug effects.
- Integrating explainable AI techniques for model transparency and interpretability.

### **Certifications & Awards**

---

- AI/ML/IoT Bootcamp — Bondstein Technologies Ltd. & ICT Division, Government of Bangladesh
- Best Project Award — Lifeline Charity Platform, Department of CSE, Green University of Bangladesh

### **Interests**

---

Machine Learning Applications, Explainable AI, Data-Driven Systems, Software Engineering, Competitive Programming Practice, Open-Source Learning
