

# MD. ZEHADUL ISLAM

I am a dedicated CSE student at Green University of Bangladesh with a strong passion for learning and technology. I enjoy competitive programming and have completed several projects that strengthened my problem-solving skills. I am currently working with data, Machine Learning, and Artificial Intelligence to build practical and impactful solutions. Motivated, adaptable, and team-oriented, I strive to contribute effectively and grow through every project and collaboration.

## Education

- SSC**  
Ragoi High School  
2016 (Cumilla Board) - GPA: 3.67
- HSC**  
Hajigonj Model Govt. College  
2018 (Cumilla Board) - GPA : 4.90
- BSc. in CSE**  
Green University of Bangladesh (GUB)  
Start Date: June, 2022  
Expected Graduation: June, 2026  
Current CGPA: 3.07  
  
Purbachal American City,  
Kanchon 1460, Dhaka, Bangladesh

## Skills

**Languages:** Python, Java, C/C++  
**Web Tools:** HTML, CSS, JavaScript, PHP  
**Machine Learning:** NumPy, Pandas, Scikit-learn  
**Databases:** MySQL  
**Technical Tools:** Figma, LaTeX, Luchidchart, Canva  
**Competitive Programming:** Codeforces, CodeChef, AtCoder, LeetCode

## Technical Projects

- ARFF Tree Explorer AI Project**  
ARFF Tree Explorer is a Python app to upload ARFF files, preprocess data, train models, and visualize decision trees interactively.
- University Management System**  
Java-MySQL University Management System for managing records, exams, courses, grades, fees, and leaves efficiently.
- Blog Website : Online Story Telling Hub**  
A dynamic blog website using JS, HTML, CSS, and PHP for user accounts, content publishing, interaction, and a responsive, user-friendly interface.
- It Club Management System**  
An IT Club Management System in C to manage members, events, resources, and finances efficiently.
- Ride Sharing System**  
Built a shell-scripted Ride Sharing System featuring secure login and ride management. Added shortest-path routing using Dijkstra's algorithm.
- Weather Tic-Tac-Toe**  
Built a Java Weather App (API-based) and a socket-powered multiplayer Tic-Tac-Toe game, showcasing skills in OOP, GUI, and networking.
